

## Bond DIMOUT

Item number 36427, KMAT 61000150

### Product description

Dimout curtains are blackout fabrics that are able to reduce the usual 40% light transmission to just 1%. The degree of darkening is 99%, depending on the color. Dimout fabrics are a double satin with a black weft. These two components create a very dense, softly flowing fabric that hardly lets any light through and has excellent acoustic properties. Bond Dimout is a striped design that alternates between a melange and herringbone structure. The Chester DIMOUT item is the counterpart to Bond, which has an all-over herringbone design. Both can be perfectly combined with each other as they are color-coordinated. Dimouts like Bond darken bedrooms and hotel rooms and enable a peaceful night's sleep. But dimouts are also excellent curtains in retirement homes, crane houses or daycare center bedrooms. Dimouts are used wherever there is a lack of classic external shading.
