

Ecoline Two DIMOUT

Item number 43728, KMAT 61000418

Product description

EcoLine stands for functional, permanently flame-retardant fabrics with a reduced ecological footprint. They are made from yarns from recycled PET bottles, among other things. Sustainability, functionality and high-quality design come together here in one product line. EcoLine Two is a dimout that can darken the room by up to 99%. A coarse, linen-like surface surprises with a soft feel. The natural character that this functional dimout has to offer is particularly noteworthy. Good acoustic values (class B) ensure a pleasant room atmosphere. Ecoline Two is available as a floor-to-ceiling product. The color palette is Scandinavian in character. Soft, powdery tones are paired with deep shades: delicate warm rose, coral, sorbet yellow and deep dark blue. Six neutral tones round off the color palette of 14 colors in total.
