Product description

Dimout curtains are blackout fabrics that are able to reduce the usual 40% light transmission to just 1%. The degree of darkening is 99%, depending on the color. Dimout fabrics are a double satin with a black weft. These two components ensure a very dense, softly flowing fabric that hardly lets any light through and has excellent acoustic properties. The printed Dimout Farina has a clear, understandable color combination in the form of winding brushstrokes that run vertically across the fabric. The textured printed base fabric adds vibrancy.

Farina is part of a commercial print series that is used in the health & care sector as well as in hotels.
