

## Zag

Item number 34537, KMAT 61000102

### Product description

Zag is part of a sophisticated jacquard series consisting of the three decorative items Gallery, Zag and Circle. They are characterized by a sophisticated interplay of weave and colour. Geometric line and surface designs adorn the matt surfaces with a natural look. The geometric zigzag design Zag, made up of fine lines, has a modern 3D effect thanks to the use of shrink yarn in the weft. Zag is available in a fabric width of 140 cm and has a very good light fastness of 6-7. The shrink yarn gives the back of the fabric a shiny look. This ensures that Zag achieves good transmission values and therefore offers protection from the sun, glare and UV rays. The 11 colorways are partly tone-in-tone, partly with strong contrasts between background and line.
