

## Easy Cleaning System for DELIGARD Upholstery Fabrics

The innovative DELIGARD technology prevents liquids from entering the fibre. Each individual fibre is protected by a special coating. In addition the fabric backing prevents the penetration of moisture into the upholstery. Unpleasant odours thus have no chance.

Stains caused by intensive use or the remains of food can be easily removed by using simple products. . Just water, washing liquid and a brush are sufficient to remove even persistent stains from the upholstery.

Tips for cleaning the DELIGARD fabrics:

1. Remove remaining dirt with a brush.
2. Wet dried stains with warm water and then use a brush.
3. If there are still remainders visible dab the stain with a solution of water and some drops of a mild cleaning liquid (mixture about 10:1). After a short exposure time treat the stain with a soft brush or the rim of a spoon. Afterwards dab and dry the treated stain with a clean cotton cloth.
4. Always treat stains from the rim to the middle in order not to enlarge the stain.
5. If necessary repeat step number 3.
6. Clean the treated stain with lukewarm water and dry it. The remains of the washing liquid must be removed completely.
7. Velvet fabrics must be left to dry before being brushed in the suade direction.
